"Re: Explanation of profit after tax figures for the second quarter of 2026"

Ho Chi Minh City, July 20, 2026

To: **HANOI STOCK EXCHANGE**

The shares of Tam Duc Cardiology Hospital Joint Stock Company have been officially traded on the UPCoM market since February 6, 2017, under the ticker symbol TTD.

According to the Company's financial statements for the second quarter of 2026, its profit after tax for the second quarter of 2026 decreased by 25.58% compared with the second quarter of 2025.

Revenue decreased by 5.7%, while costs decreased by only 0.7%, resulting in a sharper decline in profit. The relatively high level of costs was mainly attributable to the following factors: the ratio of pharmaceutical and medical supply costs increased due to changes in the revenue mix. Revenue from the pharmacy, interventional cardiology and cardiac electrophysiology segments increased. However, the profit margin of the pharmacy segment was low due to compliance with regulations on drug markups, while the ratios of medical supply costs in the interventional cardiology and cardiac electrophysiology segments were high, resulting in a significant decline in overall profit. Salary expenses also increased compared with the second quarter of 2025 due to periodic salary increases and on-call allowances. In addition, certain other expenses increased compared with the same period in 2025 as service providers raised their prices.

Respectfully.
