

24 May 2019.

In my more than 1 month of staying here in TAM DUC HOSPITAL, I find it safe and good for my health. The doctors and nurses are friendly ~~at~~ they really do their job properly. I feel like I'm only in a vacation. The other staffs are friendly and helpful also. The doctors and nurses are very compassionate to their patients.

I thank you all for ~~my~~ your help to me and for attending to my needs also of my room mates.

You all found ~~my~~ the source of my long-time fever. Thank you for being patient with me.

This hospital is very good and worth of staying. The bills maybe high but it's okay because the patients are safe (with the cooperation also ~~at~~ to the nurses and doctors)

The food is good, the hospital room is clean and also the surroundings. May this hospital have more patients to help to get well soon and may it have more friendly nurses and doctors to help get hired here.

This hospital deserves a recognition from the government and become a model to follow by other hospitals.

Room 129
